Re: Proposed Amendments - Section 18.6 Green Infrastructure Objectives, Map no: 18.11.

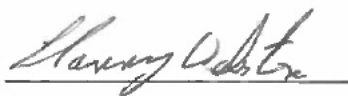

To Whom it may concern,

It is noted that this is the third attempt to create a walkway in the last 20 years across our land at Dunbur Head & Dunbur Upper, Wicklow.

We had understood that the subcommittee under councillor Pat Vance had addressed this matter conclusively. It is our understanding that no walkway would be proposed, designed or suggested without prior consultation or agreement with all affected land owners. We have not received any notice letters or communication directly from the County council about this proposed interference with our private constitutional or other legal rights. We also note that there has been no adequate study to justify the walkway, such a proposed walkway would be an interference and intrusion on a designated wild life area.

The map issued with the above reference is extremely premature and should be deleted as it will cause confusion to the general public and would be an invitation to trespass.

Yours,

Harry Webster
